

Basic Business Requirements:

- **Content Upload and Organization:**

Enable users to upload books, articles, and research materials, organizing them into categories like shelves in an ever-expanding library.

- **Search and Discovery System:**

Implement advanced search and filtering tools, helping users navigate knowledge like explorers charting a path through a vast archive.

- **User Reading Lists and Bookmarks:**

Allow users to save and organize materials for later reading, creating personalized collections like curated exhibitions of ideas.

Advanced Business Requirements:

- **Collaborative Annotation and Discussion:**

Provide tools for highlighting, commenting, and discussing documents, transforming reading into a shared intellectual dialogue.

- **Recommendation Engine:**

Use machine learning to suggest relevant materials based on user interests, guiding learners like a knowledgeable librarian.

- **Knowledge Contribution and Publishing:**

Allow users to publish their own research or articles, cultivating a living ecosystem of knowledge where ideas continuously grow.
